A text is a piece of writing that you read or created. The type or characteristics of a text are very important for any job of re-employment on it. It is easier to select the main ideas from certain types of texts, such as narrative ones (texts "œtelling a story) then from others, such as the exhibition texts (texts â€" The type of texts depends on their purpose, structure and linguistic characteristics. One of the most commonly used classification text materials is that it is based on the purpose and meaning of the text. In this classification, there are three main categories: Exposition texts narrative texts and argumentative texts. An exhibition text is intended to identify and characterize experiences, facts, situations and actions in abstract or real elements. The exhibition texts are intended to explain, inform or describe and are the most frequent to write structures. The exhibition structures can be classified in five categories: Description, in which the author describes features of arguments, features, attributes, etc. And it provides examples. Procedure or sequence: The author lists several activities in their chronological order or lists the elements in a numerical order. Comparison: the author explains how two or more objects, events, experiences, are equal and / or different. Due-effect explanation: the author presents ideas, events in time or facts as causes and the resulting effect (i) over time. Presentation of the problem solution: the author describes a problem and provides one or more solutions to the problem. In the exhibition category, non-imaginary texts have a specific role to inform or teach readers. They can come in various formats, depending on the area of use: Business: relationships, letters, executive summary. Journalism: essays, news, press releases, sports news. Technical communication: User guides, technical or standard relationships. Academic and scientific communication: textbooks, student guides, scientific reports, scientific journals - Articles, Articles for encyclopedia. General reference: Encyclopedia articles or multi-domain informative texts, such as Wikipedia articles. A narrative text keeps, instructs or informs readers about a story. The narrative texts deal with imaginary or real worlds and can be imaginary (fibes, novels, science fiction stories, horror or adventure stories, fairy tales, myths, legends, etc.) And not imaginary (articles, reports in newspapers, historical writings). The argumentative texts aim is to change readers' beliefs. They often contain negative qualities or features of something / someone, or try to persuade their readers that an object, product, idea is somehow better than others. You should note that a few texts are purely a type: Expositional or argumentative texts may contain narratives or evaluative elements. Remember that typestext refer to the meaning of writing, and should not be confused with writing formats (or other materials): the book, book,Letter, report, essay, etc. Text types are any type of writing you have read or created. This can be all from novels, newspaper reports and textbooks for recipes, movie reviews and game instructions. A text-type scaffolding is a simple framework that helps you build and create a piece of writing. There are nine different types of text that you will use at school. Each has its own purpose, structure and uses specific language features. The text type scaffolds included in this diary are designed to help you create your own writing piece. All scaffolds will contain the following information. Purpose This explains when and why you could use a particular type of text. Language features are different types of text require particular use of language. This information lists the type of words you should use in text building. You should read the glossary at the end of this section to clarify your understanding of the terms used. Structure Each piece of writing has a number of parts. Each part of the writing has a specific role in the whole piece. This section of the scaffolding gives the contour and order of the parts of a text. A very short and simple example accompanies every explanation to help you understand the expectations of the type of text.
