Minecraft is a legendary construction simulator developed by the Swedish Mojang studio. The project was unprecedented success, captivating users from different countries. The company has sold almost 100 million copies until today. Subsequently, many developers tried to use the idea implemented by the Swedes. But all the analogues were lower than the original. The minecraft game for Android is done in the sandbox or "sandbox" style. The classic levels of history is missing, which gives participants almost complete the freedom of action. It takes users in a kind of world consisting of cubic fragments. Wood, stone, cement, water, sand, grass and other blocks are a unique building material. A player can create his world of gaming from them. We must build houses, castles, roads, bridges, set up parks, forests plants. Little by little, a huge city will grow on the map, where they will live different creatures. Each block has unique properties that must be used. If desired, the participant can change the characteristics of the material. The Minecraft project has two modes: creative or creative and survival or survival. Both options relate to construction. The player creates a unique world, assembles buildings, infrastructure and various natural blocks. This will require imagination, design and construction capacity, thinking outside the diagrams. The creative mode in Minecraft is more suitable for beginners. There, participants receive complete freedom. You can create beautiful and original locations and study them. The survival mode includes additional missions. Having solved the main task, you have to master the new world and learn how to survive there. The user will have to look for weapons and armor, get food and resources, build shelters. The creepy monsters come on the surface at night. To survive, the player must fight with nightmare creatures. After downloading and installing the Minecraft game, you need to go to the settings and select a map ready to create a new world from scratch. Built-in multiplayer allows you to collaborate with other participants. Events will be displayed in first person or side. This is also set up in the settings. The project has a simple management and user-friendly interface. The legendary Minecraft will turn to children and adults and help you spend interesting time and usefully.
