Do not listen. Feeling every moment you don't just want to hear your movies, music and TV. You want to hear the crushing footprints of a T-Rex on the screen, the roar of the crowd when the losers win the game, and the pumping of the heart, the chorus beaten in your favorite song. That's why we decided to design the best construction site in the world, the Bose SmartBar Soundbar 700. Characterized by an unparalleled combination of sophisticated design and exceptional sound, this subtle soundbar is packed with technologies that turn complete power at any time of yours fun. But this is not just the sound Ã ¢ â,¬ "It is for the experience. Good sounds, wherever the calibration of the Auditiq audio room will optimize its acoustic performance for the unique features of your room - offering you the best possible listening experience . Future updates The Bose Soundbar 700 has always improved. The future software updates will unlock new features Ã ¢ â,¬ "as integrated voice control when it becomes available in your region. Tranquility technology Soundbar's built-in doors use a durable screen piece to reduce noise while you get more sound through a smaller opening. The result? Low-free distortion from a thin profile. Phaseguide technology Phaseguide proprietary technology works with tiny direct transducers of the multidirectional sound, delivering an unprecedented level of spaciousness. You will feel like a sound coming from places outside your soundbar. Custom-made proprietary conductors, low-profile transducers offer superior clarity while maintaining an incredibly subtle design. A remote control is everything you need tired of trying to figure out which remote goes with which device? We understand it. So we designed a remote you want to use. The Bose Soundbar universal remote control is included with the purchase of your soundbar and allows you to manage all your entertainment with the simple touch of a button. It has six presets and illuminates only the buttons you need at the moment, making it even easier to find your favorites. Ã, the Bose Smart Soundbar 700 is part of a Bose family of speakers and Bose sound bar. And the control is easy with the Bose Music app, which allows you to manage everything from your phone. Bring all your fun to life Ã ¢ â,¬ "Music, Film and TV Ã ¢ â,¬" in any room you want. Your guide to select the best soundbar for your home The only 5 system is designed primarily to provide a better TV sound with an emphasis on dialogue. Greatly improves your TV sound and helps with the intelligibility of dialogue. It provides a large soundstage (much larger than the bar itself) and brings your music and movies to life by immersing yourself in the sound. You will hear the sounds coming from places where there are no physical loudspeakers. The Bose Smart Soundbar 700 also includes adaptiq audio calibration technology, which adjusts the soundbar sound to better adapt your room, no matter the shape or decor. So it sounds better. Yes. The optional soundbar wall bracket, New Bose allows you to mount the soundbar on the wall. ADATIQ is part of the overall installation process and driven through the Bose Music app. You will be asked to run Adaptq after downloading the Bose Music app and start the configuration process. If you jump running FitAQ during the initial installation process Ã ¢ â,¬ "or significantly changes your room after initially running adaptiq Ã ¢ â,¬" you can go back in the app and do it again. Start Formaq and follow the instructions in the app. Press and hold the Bluetooth source button on the remote control for several seconds (the light will flash on the Bose Smart Soundbar 700 remote control). Make sure the mobile device is Coupling mode and select Bose Smart Soundbar 700 from the list. You can also pair your mobile device to Soundbar using the Bose Music app. The Bose Smart Soundbar 700 is equipped with a new backlit universal remote control. The line of sight is not required between the remote control and the soundbar because it does not use it. IR. Bluetooth Low Energy remote uses to communicate with the audio bar and then explosions Soundbar IR commands to control other devices. The simplest way to connect the intelligent Bose Soundbar 700 is via the supplied HDMI cable to the TV. If the TV is equipped with an HDMI-ARC or HDMI-Earc connection, you need to use this connection. If the TV does not have an HDMI connection, then you should connect the intelligent Bose Soundbar 700 to the TV using the optical cable (supplied with the intelligent Bose Soundbar 700). There are two ways to control other devices: HDMI-CEC and IR. Soundbar can be able to control connected devices (TV, Blu-ray player DISCA â ¢ player, game console) on HDMI-CEC. This allows you to activate other devices and operate with the remote sound bar without any programming. It also allows one-touch entertainment access, allowing you to turn on multiple devices and select an input with a single press button. However, not all devices respond to these commands. In particular, cable and satellite boxes may not respond to HDMI commands. The customer can still check the devices that do not respond to the HDMI commands by programming the Bose Soundbar Universal Remote (included with the intelligent Bose Soundbar 700). The intelligent Bose Soundbar 700 uses the reflective surfaces of the room to offer a wide home theater experience. To ensure optimal audio performance, the soundbar must be placed equidistant from each side wall and directly in the front-central part of the TV. No object must be placed in front of the soundbar, nor is to be placed inside a recessed wardrobe, as this it would translate into a limited laying theater. No. All sources must be connected to the TV and then a single connection (via the HDMI or optical cable) must be carried out by the TV to the SoundBar. Yes. The intelligent Bose Soundbar 700 can play music directly via Wi-Fi from Spotify, PandoraÃÂ®, Tunein, IhearTradioÃ â ¢, Amazon Musica, SiriusXM, and Deezer. Apple has AirPlay compatibility 2 Allows access to Apple of music, and other services can be accessed by playing from a device via a Bluetooth connection. Musical and voice services may vary. Yes. Bose Soundbar 500, Bose intelligent Soundbar 700, the intelligent Bose Soundbar 300 and the Bose BASS Module 500 and Bose Bass Module 700 Each use The same wireless protocols and can be mixed and matched (for example, a Bose Smart Soundbar 700 wires coupled with a Bose Bass Module 500 or a Bose Soundbar 500 with a Bose Bass Module 700). However, the language and materials of the Bose Soundbar 500 and the intelligent Bose product lines Soundbar 700 design have been designed to integrate the product into the same class (for example, Bose Soundbar 500 products together and Bose intelligent Soundbar 700 products together). So, the glass on the intelligent Bose soundbar 700 products looks more complementary together than if you mix only a Bose Soundbar product 500 with a 700 product of Bose intelligent soundbar. Active Soundbar Wireless Speaker Multiroom Audio Active SoundBar Speaker Bose Premium Sound: The Bose Soundbar 700 uses a low-profile DSP-controlled amplifier and designed to low-profile proprietary transducers to provide exceptional details and depth with crystal clear dialogue. The phaseguide proprietary technology works with small transducers to direct multi-directional sound beams, offering an unprecedented level of space. Quietport technology is integrated into the audio bar with recessed doors that use a resistant screen piece to reduce turbulent noise Get more sound through a smaller opening, resulting in virtually low without distortions from a slim profile speaker. ADAPTIQ Audio Camera Calibration: ADAPTIQ Audio Room Calibration allows you to optimize Bose Soundbar 700 acoustic performance for the unique features of your room, offering the best possible listening experience. A through the Bose Music and the supplied headset, ADAPTIQ audio calibration customize the sound of the At the acoustics of your listening area taking five audio measurements. During ADAPTIQ audio calibration, a microphone on the upper part of the Appateest measures the sound features of your room to determine the quality of the optimal sound. To run Adaptiq, you will need 10 minutes when your room is quiet. Note: If you subsequently connect an optional bass module or surround speakers, move the audio bar or move furniture again, run the ADAPTIQ audio calibration again to ensure optimal sound quality. Optional wireless surround: The Bose Soundbar 700 supports wireless rear speakers and a Bose wireless bass module (both sold separately). BASS module: The BOSE BASS 700 (sold separately) module adds low deep and fragotable to Bose Soundbar 700. It connects to wireless mode to the soundbar speaker and has a wireless interval of about 30 '. Its compact and cube design fits well in any room. The Top base module can be positioned almost anywhere in your room, but positioning it on the same wall of the soundbar will provide the best performance. If you want even lower, you can connect to two BOSE BASS 700 modules to BOSE SOUNDBAR 700. The Wireless sub will require AC energy. There is also a mono-minijack output at the back of the Bose 700 soundbar, if you prefer to carry out a wired connection with the Bose Bass 700 module. Surround speakers: for a completely immersive audio experience, add the Surround Bose speakers or the Bose 700 surround speakers (both sold separately) to Bose Soundbar 700. With a wireless range of about 30 'and standing less than 4 "highs, these wireless surround speakers blend well in your room. The speakers must be positioned behind the 'Main listening area, one on the left side and one to the right of the room, for optimal sound quality. Both speakers require AC power supply. HDMI ARC Jack: The Bose Soundbar 700 is equipped with a single HDMI ARC jack to connect The SoundBar to the ARC HDMI input TV. The HDMI ARC jack allows you to send the audio from the TV via the Soundbar speaker. The unit supports Dolby Digital (up to 5.1), DTS (up to at 5.1ch) and 2CH Audio PCM. Note: Some TVs will only pass 2CH PCM through the HDMI input arc-enabled from devices connected to the TV via HDMI or analog and pass only Dolby Digital using the built-in TV tuner, network or USB apps. Optical digital input: If the TV is not equipped with an HDMI ARC jack, the BOSE SOUNDBAR 700 also has an optical digital input (TOSLINK) which supports 2CH PCM and 5.1CH Dolby Digital or DTS. This module does not offer analogue audio inputs. Note: The digital optical output of many flat panel televisions Send only an audio signal in 5.1CH when you receive Dolby Digital / DTS surround audio from the built-in TV tuner, the network connection or the connected USB device; And it will only produce 2CH stereo from sources connected to TV via HDMI or RCA (like your Blue-ray / DVD player or satellite / cable box). Remote control: Bose Soundbar 700 is equipped with a universal Bluetooth remote control and supports HDMI-CEC. It is also possible to program third-party remote (sold separately) to control the SoundBar system. Universal remote: Universal Bluetooth remote control includes wireless soundbar speaker system without direct view line. You can also program the universal remote control to control the TV, the Blu-ray player or the cable / satellite box. The remote control is designed elegant with an aluminum premium accent and a seamless elastomer keyboard that is soft to the touch. Backlight ingenious remote control shows only the relevant buttons for the task at hand. Whether you are listening to music or watching TV, the remote control is automatically adapted to illuminate the necessary buttons at that time. The Bose Music app on your Apple iOS or Android device will be used to pair the universal remote control with the BOSE Soundbar 700. HDMI CEC: Soundbar is able to control the devices connected to HDMI (such as the TV, the blue player- Ray Disc, game console) Game) HDMI-CEC allows you to activate other devices and operate with the remote sound bar without any programming. It also allows one-touch entertainment access, allowing you to turn on multiple devices and select an input with a single press button. 3rd Party IR Remote controls: Because the Bose Soundbar 700 also supports IR commands, you can also program a third-party IR remote control, such as cable / satellite receiver or remote TV, to check the soundbar. Refer to the instruction manual of the third-party remote control or a website for instructions. Not all third-party remote controls are compatible with SoundBar. The 3.5mm IR input on the back of the Bose Soundbar 700 allows you to connect an IR extension device (sold separately) if the IR receiver of the soundbar is obstructed from the view. Bose Voice4Video Technology: Bose Voice4Video technology allows greater soundbar control using the built-in microphone, Amazon Alexa, and your voice. In addition to checking the SoundBar speaker, you can control the TV and cable or satellite with only a simple Voice.With to ask for Alexa, you can switch on soundbar and TV, tune in to a station based on the network name or Channel number, and start watching your favorite programs instantly. Notes: Bose Voice4Video Technology requires a Wi-Fi wireless network connection and installing Alexa apps on your Apple iOS or Android compatible device. Bose Voice4Video The technology is not currently compatible with Google Assistant. Positioning options: The Bose Soundbar 700 uses the reflective surfaces of the room to offer a wide home theater experience. To ensure optimal audio performance, the soundbar must be placed equidistant from each side wall and directly in the "front center" of the TV. No object must be placed in front of the soundbar, nor is to be placed inside a recessed wardrobe, as this it would translate into a limited laying theater. Moreover, nothing must be positioned directly on both sides of the Bose Soundbar 700 as there are no side-firing transducers located on both sides. Optional wall bracket: The Bose SoundBar Wall Bracket (sold separately) has been designed specifically for the Bose Soundbar 700 and blocks the soundbar diffuser horizontally above or under the flat screen TV. A cable cover is included to hide the HDMI and / or optical cable that runs from the TV to the 700 Bose Soundbar speakers. The Bose SoundBar wall bracket has a high quality steel structure and is available in a black or white finish. Alternating current: The Bose Soundbar 700 works out of domestic current using the 5 'detachable AC power cord supplied. Wireless MultiRoom Audio Multiroom Audio: The Bose Soundbar 700 is part of a new family of Smart Home Speakers and Bose Soundbars that can be used to create a wireless multiroom sound system on your home. You can start with a Bose Soundbar 700 and add more speakers and Soundbars Bose Smart Home (including the Bose House Speaker 300, Bose Casa Loudspeaker 500, Bose Portable Speaker, Bose Soundbar 300, Bose Soundbar 500, and Bose Soundbar 700) For Create a Wireless Audio Multiroom system at home. Number of audio zones: Up to 4 zones can be created. Each area can be set to reproduce the same audio source or destined to perform different audio sources. It is also possible to group different areas. Compatible sources Multiroom Audio: the radio via the Internet, select online music services, and Bluetooth audio can be heard on a single speaker or multiple loudspeakers. Incompatible audio sources HDMI and optical digital input do not support multiroom audio. Note: The family of Bose Smart Home Speakers and Soundbars is not compatible with the Bose Soundtouch family products. Wired or wireless network connection: The BOSE SOUNDBAR 700 offers a wired (Ethernet) or wireless (WIFI) connection to the home network. The BOSE SOUNDBAR 700 is equipped with an Ethernet and integrated R-J45 socket (2.4 / 5 GHz) WIFI (802.11 b / g / w). system network connection can be initially set initially The Bose Music application on your Apple iOS or Android compatible device. Bose Music App: The Bose Music application (for Apple iOS 10.3+ and Android OS 5.1 +) allows you to set and control the compatible intelligent Bose speakers and Soundbars from your Apple iOS or Android device.â, works with one or many of the new ones Bose family of intelligent diffusers and soundbars. Using the application, the mobile device acts as a remote control for the speaker. From the application, you can stream music, set and preset modify, add music services, explore Internet radio stations, configure the Alexa and manage speaker settings. Music Control: The Bose Music application allows you to browse and reproduce the music you love from Spotify, Pandora, Amazon Musica, SiriusXM, IhearTradio, Tunein, and more from the Apple iOS or Android device. Even the Bose Music app is easy to establish your playlists or favorite stations as a preset (up to 6 presets), so you can access them effortlessly. Multiomaria / Multi-Source: The Bose Music app lets you control one or more Smart Bose speakers and Soundbars of your home. You can play the same music throughout the house or listen to different music in different areas. Audio settings: The Bose Music application can be used for volume control and adjust the level of bass and highlights of those who speak. Multiple users: The Bose Music app allows multiple users customize their experience and controls their content. A person can quickly access their spotify playlist, while another listens easily the last podcast. Now it's simple for the whole house to enjoy your favorite and more music. Simple simple: the Bose Music app also makes the configuration easy, walking for each step. Just download the Bose Music app on the device, connect the loudspeaker and open the app to start. The application will guide you through the account configuration on the speaker, adding account information for your favorite music services, and adding Amazon or Google audio product server. Voice control with 8 microphone Array: The integration of Alexa and Google Assistant with the Bose family of Smart intervene will replace the vast majority of Alexa and Google Assistant's functionality; Including music playback, control of smart home devices, timer settings and alarms and general information requests. A, owner Terraced 8 custom-made microphones on the soundbar is precisely positioned for accurate close field and field away from receipt of the voice. You can be sure that the Bose Soundbar 700 will listen to you even when there is a lot of noise in the background, the music is playing high volume, or six on the other side of the room. Musical control: Currently you can ask Alexa or Google to play music from Pandora, Iherradio, Deezer and TuneIn on a specific speaker, a group of speakers or all speakers. Alexa Voice Control is also supported by Amazon Music and SiriusXM. Once the music is playing, you can also ask Alexa or Google "what is playing", "Volume turns up to top or down", "Switch to the next song", "Go to the track Previous ", or" Music stop ".â, Smart Home Ability: Various Alexa and Google Skills Smart Home Device Work through the Bose Soundbar 700, its built-in microphones and integration of Alexa and Google Assistant. For example, you can ask Alexa or Google- "Set the Smart Thermostat to 72 degrees" or "Turn off the lights". News and information: Use the intelligent Bose speaker to ask Alexa or Google on the world and local news, traffic, weather, sports, and other topics or events. Alarms and timers: Alexa or Google can be used for Timer and alarms. Timer and alarms are carried out only through Alexa or Google and corresponding apps, not through the Bose Music application or checks on Bose Soundbar 700. Notes: You can only use a digital assistant; You need to choose between Alexa or Google (you can't use both). There are some of Alexa and Google skills that the Bose Soundbar 700 does not support; Like the call and hands-free messaging. Alexa & Google Assistant is not available in all languages and countries. The use of a virtual assistant is optional; You can Music from the Bose Music app and other sources without using Alexa or Google. The option to enable Alexa or Google can be rejected in configuration and revisited at any time. You can also remove Alexa or Google from the speaker at any time via the Bose Music app settings menu. And when Alexa or Google is installed, the microphones can be deactivated â €
